Final-year B.E. Cyber Security student with **3 internships**, **7 verified credentials**, and a **Top 3% global TryHackMe ranking** across hundreds of thousands of users. Specialises in WAPT, red team operations, and full-lifecycle penetration testing. Reports are **MITRE ATT&CK-mapped**, **CVSS v3-scored**, and delivered with validated remediation zero re-submissions at Ozone Cyber Security. Two years of enterprise IT infrastructure background provides real-world system knowledge that sharpens attack surface analysis.

EXPERIENCE

Cyber Security Intern

Feb 2026 · Remote

ShadowFox **VIP Performer · C.ID: SF02VIP140**

- Identified **critical attack paths** via network reconnaissance and web exploitation across simulated enterprise environments.
- Completed all programme modules ahead of schedule; awarded VIP Performer by ISO 9001 / MSME certified organisation.

WAPT Intern

Jun-Jul 2025 · Tiruchirapalli, TN

Ozone Cyber Security **Signed Reference**

Ref: OZ/DOC/210720255

- Discovered **SQLi, XSS, IDOR & auth bypass** on live production targets — every finding CVSS v3 scored with PoC and validated remediation. **0 re-submissions**.
- Full pentest lifecycle: scoping → recon → exploitation → reporting using Burp Suite, Nmap, Metasploit, OpenVAS.
- Formally commended in writing by Cyber Security Specialist VISWESH S S for excellence and punctuality.

Cyber Security Intern

Mar-Apr 2025 · Remote

Corizo — IIT Bombay Mood Indigo **Wipro Dice ID: CRZ94377**

- Completed **160-hour** programme — threat intelligence, SOC operations, and vulnerability management across 6 enterprise scenarios.
- Delivered incident response playbooks for malware containment and lateral movement detection.

UPS Service Engineer

Jun 2022 – Jun 2024

TD Infra Services, Chennai · Numax Energy, Hyderabad

- 2 years enterprise IT infrastructure — systems reliability, fault diagnosis, SLA delivery. Pivoted to B.E. Cyber Security in 2024.

PROJECTS

Dual-Layer Wireless IDS/IPS

Python · Scapy · 802.11 · Kali Linux

Passive + active dual-layer system detecting and blocking five real 802.11 attack vectors using signature-based and anomaly-based analysis. Validated in controlled lab environment.

<200ms detection 5 attack vectors 70% faster response
0 false negatives

IoT Infrastructure Security Monitor

Python · ESP8266 · Arduino · MQ-135 · DHT11

Real-time sensor array monitoring CO₂, PM2.5, VOCs, temperature & humidity with wireless cloud sync, threshold alerting, and Python anomaly detection — OT/IoT security proof-of-concept.

5 sensor types Real-time cloud sync Anomaly detection
